

UV-IR Control Detector

UV-IR OPTICAL DETECTOR

Optical detectors detect the fire ball created by the ammunition penetrating into the armour within 3 milliseconds, before it reaches to the pressure and heat level that can harm its surrounding, and send an alarm signal to control box on vehicles which are hit by RPG or ATGM rockets. It detects heat and light waves at different frequencies by UV and IR sensors within it, makes required matches and send flame signal to control box. Detectors are genuinely designed by Nero Industry engineers according to NATO Stanag 4317 and American MIL PRF 62546C standards. UVIR flame detectors have also successfully passed high temperature, low temperature, humidity, shock-vibration, corrosion and EMI/EMC tests as per MIL-STD-810H and MIL-STD-461F standards.

Detectors have been specially designed as IP67 and can stay under 1 meters of water for half an hour. The detectors also having protection for false alarms, do not react against false alarms such as sunlight, vehicle headlights, welding beam, infrared heater, cigarette ash. Along with these systems protecting the engine and the crew on military armoured vehicles, electric vehicles, buses, planes, jet planes and ships; total 40 thousand detector accomplish their duty in the field.

TECHNICAL SPECIFICATIONS

| UV/IR dual sensor - Thermal Sensor 180 C° fire detection thermal sensor 140° blind spot detection Sensitivity against creeping fire MTBF duration of 150,000 hours Production as per PCB IPC A-610 class-3 IP67 water and dust ingress protection Dimensions (WXLXH): 96 x 58 x 137 mm (±5 mm) Salt fog resistance: 800 hours Immunity to false alarm as per MIL-PRF 62546C Power supply: 24 VDC nominal (16-32V) Power consumption: 70 mA @ 24 VDC Advanced software algorithm Operating temperature: -51 / +120 °C | |

| • Weight : 480 g ±50g | , , |
| • MIL-STD-810H, MIL-STD-461F, MILSTD-1275E certifications | , |
| • Conforming to UL, CE GOST-R standards | , |
| • 10 years of shelf life | , |

FALSE ALARM CHART

| Test Performed | Spec Requirements |
|---------------------------|-------------------|
| Headlight (55-65 W) | 15 cm |
| Incandescent Lamp (100 W) | 2,5 cm |
| Halogen Lamp (500 W) | 5 cm |
| Fluorescent Light (40 W) | At any distance |
| UV Lamp (75 W) | At any distance |
| In-Vehicle Lighting (5 W) | At any distance |
| Match | 20 cm |
| Sodium Lamp (70-250 W) | At any distance |
| Xenon Lamp (30 W) | 5 cm |
| Flashlight (1 W) | At any distance |
