MILITARY WEATHER STATION

Types of Weather Stations

1. **Ballistic:** Basic weather measurement capabilities.
2. **Ballistic + Compass:** Includes compass for directional measurements.
3. **Ballistic + Compass + GPS:** Adds GPS for precise positioning along with directional measurements and basic weather capabilities.

The Military Weather Station, created by NERO, is designed to monitor weather changes with high accuracy using advanced sensors. It communicates data to users via **RS-422**, **Ethernet**, and **CAN-BUS** interfaces. This station measures:

It is compatible with wheeled-tracked vehicles and command control shelters that have light and medium caliber weapons.
