

AC/DC CONVERTER

220VAC-28VDC CONVERTER

AC/DC CONVERTER

- There is a visual and voiced alert for high voltage error, short circuit error, battery charging error and Converter error
- When engine starts, Converter stops running automatically.
- Able of converter is at least 5 meter long and transportable.
- With Battery Temperature Reading feature, Converter can adapt the charging current automatically and stop the operation if necessary. After the operation, Converter is shut down automatically.
- It could be assembled as a DC power supply or battery charger.
- Converter could supply 80A in DC mode independent from engine.
- In battery charging mode it could charge all the batteries simultaneously with 5-7 A.

SPECIFICATIONS

Input Voltage	: 90-264V
Input Current	: 16A max.
Power Factor	: 0.95
Max. Output Current	: 100A max.
Isolated Number Of Outputs:	3
Operating Temperature	: -20°C + 70°C
Weight	: 14 kg
Painting and Coating	: Customer would specify the paint and coating preferences
