

OUR FACTORIES

NERO Endüstri Savunma Sanayi A.Ş. which operates in United States of America, Bulgaria and Turkey at Ankara headquarters, is one of the largest subsystem manufacturers in Defence Industry in Turkey. Our company which is located on a plot of 12.000 m2 in Anatolia Organized Industrial Zone; has been performing hundred percent domestic design, manufacture and provide system solutions since its foundation in 2009. More than 100 engineers are assigned within its staff of 210 people. Besides, it imports 29 different countries in the world. While our group companies operate in Space Aviation field, Defence Industry, it also comprises one of the largest test centres of Turkey regarding Defence Industry

By combining design, production, monitoring, control and improvement methods conforming to ISO9001 and AS9100 standards with quality engineering and test infrastructure, it successfully competes with its global competitors and accomplishes outstanding projects together with world leaders of the sector.

Nero Industry has started project designing phase of the factory for the project which is worth 1.6 billion TL together with project-based investment incentive support on Presidential decree published in official gazette on 20th April, 2020 in order to establish Turkey's first semiconductor production factory. Turkey's first semiconductor serial production facility which will be established on 300.000 m2 plot, will bring our country to the level where we will be able to compete with semiconductor companies at global level. Nero Industry, together with its high qualified employees will create first investment phase of Turkey in this field with this project.

Within the scope of designed and qualified systems,

ARES - Fire Suppression Systems, MARS - CBRN Detection and Filtration Systems, ARMA - Power Systems, UMAY - Laser Detection/Warning and Smoke Grenade Launcher Systems are included.

NERO INDUSTRY SYSTEMS IMPORT TO 29 COUNTRIES

- Turkmenistan
- United Arab Emirates
- Canada
- India
- •Thailand
- Kazakstan
- Latvia
- Esthonia
- Lithuania

• Singapore

LASER WARNING AND SMOKE GRENADE SYSTEM

Laser warning systems are the systems used for detecting laser guided threats, classifying these threats and taking precautions against these threats on military vehicles or sea platforms. The systems consist of laser warning sensors, control units and smoke grenade launcher systems.

On these systems, when laser threats at NATO Stanag 3733 standard, mark the platform used with a laser or target it with laser, the systems analyse incidence angle, incidence direction of laser and the class laser belongs to within maximum 500 milliseconds, and after this analysis the system launches smoke grenade by smoke grenade launchers and creating a smoke fog gets away from the laser threat.

These systems can make detection on 4 different bands including band I, band II, band III and band IV.

LASER WARNING SYSTEM GENERAL SPECIFICATIONS

» Laser Warning System (LWS) is designed for dete- ction of laser radiation from laser assisted wea- pons and it can be used on any kinds of military vehicles.	» The system is protected against false alarms triggered by reflections, thunderbolt, gunshots and false alarms triggered by itself due to RF and electro-optical operations.
» LWS, detects, classifies and determines laser sources such as beam rider, target plotter, range finder, infrared lighteners.	» It provides detection of laser signals using impact, continuous wave and combination of these.
» LWS is an important component of defence skil- Is of the vehicle. It includes visual warning, high detection possibility and low false alarm rate.	» The system manual, semi-automatic and auto- matic activation of all kinds of grenades that the vehicle could be equipped with according to the tactical requirements in security zone.
» When the high-speed processing and communi- cation features are combined with electro-optical operation, it ensures correct and reliable operati- on.	» LWS system can detect laser radiation at wave- length between 0,5 µm and 1,7 µm and optionally 8-12 µm.

LASER GUIDED WEAPONS THAT COULD BE DETECTED

- Kornet-EM Anti-Tank Missilelahat – Laser Homing Attack Missile
- UMTAS
- AGM-114R HELLFIRE II Romeo
- Spike-MR/LR/ER
- Javelin Missile

THE REPORT OF THE PARTY OF THE

- HJ-12 (Red Arrow 12)
- BGM-71 TOW
- PARS 3 LR
- Missile Moyenne Porte (MMP)
- MILAN ER
- NLAW (Next Generation Light

LASER WARNING SYSTEM OPERATION SCHEMATIC

1

Laser Warning Systems with high detection capability developed by Nero Industry, detect, classify and determine laser sources such as beam rider, target plotter, range finder, infrared lighteners. They are applied according to structure of the vehicle, ensure 3600 detection and transmit the threat to control unit. **Control Unit** analyses the threat transmitted by Laser Warning Sensor. It activates smoke grenade launcher system according to distance and location of the detected threat.

2

5

Smoke Grenade Launcher

System ensures to create an efficient smoke screen at a battlefield with a range up to 45+5 depending on environmental conditions.

LW 1000 LASER DETECTOR SENSOR

- Laser detectors detect, classify and determine 24 different Laser code and frequencies of laser-guided antitank threats within 50 milliseconds. Besides, LW1000 can detect more than one threats simultaneously.
- It is safeguarded against false alarms such as sunlight, remote controller, hand laser as per NATO AEP 3733 standards. It has successfully passed high temperature, low temperature, high humidity, shock-vibration and EMI/EMC tests as per MIL STD 810H, MIL STD 461F and MIL STD 1275E standards.

TECHNICAL SP	ECIFICATIONS
» Wave Length Range Band I	0.5 μm - 1.1 μm
» Wave Length Range Band II	1.1 μm - 1.65 μm

LW2000 WARSHIP **APPLICATION**

UMAY SGS-3 CONTROL UNIT

Umay SGS-3 Control Unit is a control unit which can automatically control laser and smoke grenade systems.

- It has capability of:
 - -Detection
 - -Classification
 - -Transmitting incidence angle to the user on digital system

-Keeping log record for laser warning system against laser threats as per NATO Stanag 3733 standards.

UMAY SGS-3 Control Unit which can control Laser Warning system and laser grenade launcher system, has a structure that combines the leading edge and the most aesthetical specifications of its kind. It enables automatic and manual smoke grenade control.

GENERAL SPECIFICATIONS-

» Laser warning system control capability	» Power Consumption: 24 VDC nominal (16-32 V)
» Opportunity to control laser warning system and smoke grenade automatically and switch between systems	» Dimensions: 180x155x116 ±5 mm
» Capability to control up to 16 smoke grena- des	» Weight: Control Unit: 1.9 ±0.3 kg
» Built-In Test Function (BIT)	» IP67 Water and Dust Ingress Protection
» Capability to detect and control two diffe- rent types of smoke grenades	» Production as per IPC-A-610G Class 3 Stan- dards PC
» Communication Interface: CAN-BUS /RS422 / RS232 Fast Ethernet	» MIL-STD-810G, MIL-STD-461, MIL-STD-1275E STANAG-3733
» Operating Temperature: -32°C / +49°C » Storage Temperature: -55°C / +85°C	» Capability to Communicate with Other Sys- tems

- UMAY LWS-2 Contol Unit which can control Laser Warning system and smoke grenade system, can switch between laser and smoke grenade system menus easily thanks to its touch screen.
- Laser warning system transmits:
 - -Sensor status
 - -Angle of detected laser
 - -Class
 - -Band options to the user.
- Control unit with digital screen, provides easy use for the user by displaying on-vehicle schematic on the screen.

GL76 GRENADE LAUNCHER

- It is developed with 100% local resources by Nero Industry.
- **GL76 grenade launcher system** can be mounted to main vehicle externally.
- The ammunition type to be used on GL76 system are 76 mm smoke or fragmented grenade bullets.
- Smoke Grenade Launcher System ensures to create an efficient smoke screen camouflage action at a battlefield with a range up to 45+5 depending on environmental conditions.
- Dispersion time varies according to the ammunition used and optimum outturn is between 30-90 seconds.
- Capability of creating 900, 1800 and 3600 smoke screen as per customer's choice.

GENERAL SPECIFICATIONS

» 10 Years Shelf Life » » Resistant against corrosion for 10 years	 » Electrical Connection Connector: MS3476 WI 0-65 CANBUS (J1939) Connection Compliant
» Weight: 2.8 kg ± 0.5 kg	» MTBF Minimum 250,000 Hours
» Coating: Brass-Nickel coating	» Bracket options adjustable specially for vehicle
» Power Source: 28 VDC nominal (16-32)	» Moisture Resistance: %95
» Power Consumption: 120 mA ± 20 mA @28 VDC	» Vibration and Shock Resistance
» Nominal Power Consumption: 6 A ± 2 A @28 VDC	» 800 Hours Resistance at Salt Test
» Electrical Resistance at Firing Position: 1-3.5 ohm	» MIL-STD-461G, MIL-STD-810G, MIL-STD-1275E
» Electrical Connection: MS3470W10-6P	» Production as per IPC-A-610G Class 3 Standards

NU-40SGLS GRENADE LAUNCHER

Grenade launcher can be positioned on the vehicle with different options depending on the number of launchers and customer demand. Standard positioning options and effect angles are simulated in the following figures. Usually launchers are mounted on either side of the turret or multiple launchers are mounted on the remote weapon system.

For vehicles which are void of a gun turret, launchers are positioned on all sides of the vehicle's roof. Based on the free space, and allow a 360 degrees coverage. This configuration is most suitable for small caliber launchers (4 tubes) and usually consists of 4 up to 16 launchers.

COMPATIBLE AMMUNITION TYPES
- Rubber Pellet Cartridges
- Multi Impact Batons
- Single Impact Rounds
- Smoke Projectiles
- Multi Smoke Projectiles
- Barricade Penetrators
- Blast Dispersion Projectiles
- Muzzle Blast Cartridges
- Distraction Projectiles

GENERAL PROPERTIES

SHELF LIFE	10 years		
WEIGHT	11kg ± 0.5kg		
CALIBER	40mm		
RANGE	From 30m to 150m it depends according to ammunition selected		
LENGHT	380mm ± 10mm		
WIDTH	574mm ± 10mm		
HEIGHT	214mm ± 10mm		
BARREL LENGHT	150mm		
COATING	Zinc-Nickel		
PROTECTION DEGREE	360° - 180° - 120° - 90°		
POWER SUPPLY	28VDC Nominal(16-32)		
POWER CONSUMPTION	120mA ± 20mA @ 28VDC Nominal		
POWER CONSUMPTION	6A ± 2A @ 28VDC Firing Mode		
ACTIVATION TYPE	24V 2A for 10 millisecond for each tube		
ELECTRICAL RESISTANCE	1 - 3.5Ω		

OPTIONS

OPTION I	Pyrotechnical Electrical Activated
OPTION II	Resettable Electric Solenoid Activated

574 ±10 mm

SYSTEM OPERATION SCHEMATIC

UMAY DC-6 CONTROL UNIT

- UMAY DC-6 Contol Unit which can control Laser Warning system and smoke grenade system has a structure that combines the leading edge and the most aesthetical specifications of its kind.
- Control unit with digital screen, provides easy use for the user by displaying on-vehicle schematic on the screen.
- It enables automatic and manual smoke grenade control. It can communicate with other systems.

GENERAL SPECIFICATIONS

» Built-In Test Function (BIT)	» Dimensions: 180x155x116 ±5 mm		
» Capability to control two differ-ent types of smoke grenades	» Weight: Control Unit: 1.9 ±0.3 kg		
» Communication Interface: CAN-BUS /RS422 / RS232 Fast Ethernet	» IP67 Water and Dust Ingress Protection		
» Operating Temperature: -32°C / +49°C	» Maximum 12 smoke grenade control		
» Storage Temperature: -55°C / +85°C	» Production as per IPC-A-610G Class 3 Stan- dards PC		
» Power Consumption: 24 VDC nominal (16-32 V)	» MIL-STD-810G, MIL-STD-461, MIL-STD-1275E STANAG-3733		

1.	LEFT LAUNCHER EMPTY/FULL LED: Shows the full/empty status of the Launcher.	7.	BIT: Build-in-test
2.	LEFT AMMO SELECT: Selects left ammo.	8.	FIRE RIGHT: Fires right launcher.
3.	FIRE ENABLE ARMED	9.	DIAGNOSTIC: Software dowload socket.
4.	FIRE ENABLE SAFE	10.	POWER OFF
5.	FIRE LEFT: Fires left launcher.	11.	POWER ON
6.	ALL SMOKE FIRE: Fires all launcher.	12.	RIGHT AMMO SELECT: Selects right ammo.

UMAY DC-4 CONTROL UNIT

- UMAY DC-4 Control Unit has the capability to launch 4 smoke grenades at the same time.
- Number of ammunition it can control may change according to the vehicle on which system will be integrated and the smoke grenades placed at left-right and/or front/back sections of the vehicle as per customer's choice, can also be controlled separately.
- UMAY DC-4 control unit with compact design and simple user interface, has successfully passed MIL-STD-810H Environmental Tests, MIL-STD-461 EMI/EMC tests.

» Built-In Test Function (BIT)	» Weight: Control Unit: 1.9 ±0.3 kg
» Capability to control two differ-ent types of smoke grenades	» IP67 Water and Dust Ingress Pro-tection
» Operating Temperature: -32°C / +49°C	» MIL-STD-810G, MIL-STD-461, MIL-STD-1275E STANAG-3733
» Storage Temperature: -55°C / +85°C	» It has UL, CE GOST-R Certifica-tions
» Power Consumption: 24 VDC nominal (16-32 V)	» Maximum 24 smoke grenade control capa- bility
» Dimensions: 150x100x70 ±5 mm	» It is well-priced.

GENERAL SPECIFICATIONS

BUTTON SPECIFICATIONS
